North London Waste Authority supports the proposed planning designation for this site.

However we remain concerned about the requirements to optimise pedestrian and cycling connectivity through the site as part of any new development, including from the existing estate on Alexandra Road to New Southgate station, which Crossrail 2 is proposed to be connected to.

The site is not accessible at present to members of the public, (it is securely fenced off). Therefore, whilst we are pleased to see that a proposed route through the site has been removed from the site diagram in this version of the Site Allocations DPD the proposal that pedestrian and cycling connectivity through the site should be optimised as part of the design of any new development is opposed by NLWA as an absolute requirement.

Such access could severely compromise the development of the site for employment use. If the site was used for waste management purposes for example, then health and safety constraints would be most likely to prevent pedestrian and cycling access. Any such route through the site would in any case have to be so fenced in (for health and safety reasons) as to be at best an unwelcoming route, and at worst an unsafe route from a crime perspective.

6. Please set out what modification(s) you consider necessary to make the Local Plan legally compliant or sound, having regard to the test you have identified at question 5 above where this relates to soundness. why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as detailed as possible.

NLWA proposes that the development guidelines for the site SA52 be amended as follows (with proposed amendments in bold italics):

Pedestrian and cycling connectivity **from either side of** through the site, including **from** the existing estate on Alexandra Road, to New Southgate station, which Crossrail 2 is proposed to be connected to, should be optimised as part of the design of any new development **if it is safe to do so, recognising that the route and nature of any connectivity optimisation will depend upon the nature of the development.**
