**Subject:** Wood Green Action Plan

I have seen the Council's Area Action Plan for wood Green dated Feb 2017 and I wish to object in the strongest terms to the assumption, which is clearly implicit in this plan, that large volumes of road traffic will be routed to Wightman Road and the Harringay ladder including new traffic drawn in through the huge expansion of commercial activities in Wood Green. I am particularly concerned about the resulting rise in NO2 air pollution, which is already above legal limits on Wightman Road and surrounding roads. I would expect the council to be putting in place plans to reduce this pollution to acceptable levels before considering any plans which may increase this further. I have recently had a baby, and I am extremely concerned about her welfare in such a polluted environment. Harringay Council must prioritise the health of its residents over any potential commercial gain through expansion of commercial activities.

Yours faithfully
