Subject: Hornsey Filter Beds

I am very concerned about the plan to revoke MOL status for part of the Filter beds. This is an important habitat for Haringey. Until developers can truly assure that social and truly low cost housing is being built, (for example as the St Ann's Hospital Community Land Trust can), the price of losing our precious open space is too high.

There will be impact on visual amenity. Should there be building there, half the land should be set aside to recreate the shallow water habitats that previously existed.

Yours
