

SEND preparation for adulthood action plan

2022 to 2024

Our plan for getting young people in Haringey ready for their adult lives

①

Introduction

This is our plan for getting young people ready for their adult lives and supporting their **transition**

Transition is the journey from being a child to being an adult

We have worked on our plan with

- families and carers

- young people who use our services

- partner organisations

- staff

②

Our goals

This is how we will support people preparing for adulthood

- We will not ask families to keep repeating their story
- We have good communication with young people and the people who support them
- We are open and honest in the way we work

- We want all young people to live their best life

- We want to support young people to get jobs, make choices and have control in their life

- We want young people to have higher goals and be more independent

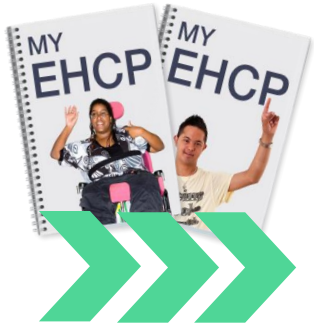

- We work with partner organisations to share ideas

③

Our priorities

priorities are the most important things

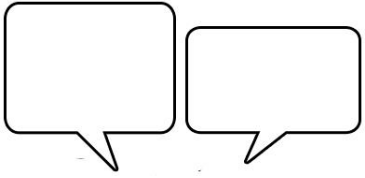

- Children and young people with Special Educational Needs and Disabilities (SEND) will have their own health pathway allowing them to transition from childhood into adulthood

- Annual Reviews from Year 9 onwards will look at a young person's transition into adulthood

- Young people with SEND will have housing that matches their needs

- Our communication and contact with families will be better

- We will make sure the right support is in place to help young people with SEND to get active and stay active

- Young people with SEND to take part in learning, training or employment

- All staff understand the transition support that is needed across Haringey and young people get the support they need at the right time

- Our approach will allow young people with SEND to feel able to talk and to listen and to feel connected

- Young people with SEND and their families will carry on helping us to develop our services

- We will make a detailed list of training, volunteering, and job opportunities

- We will have better information for families and young people about

- the move across to adult health services

- improving or managing health in adulthood

- All young people with SEND will get the chance of a social life so they can grow and keep friendships into adulthood

④

Doing a good job

We need to make sure we get it right - these are the things we have in place to make sure we do a good job

- The SEND Joint Executive Board will watch us to see how well we are doing – they will write short reports to let other people know how we are doing
- We will check to see how well we are doing by working closely with young people and their parent carers

- We will set up the Haringey SEND Youth Forum – they will let us know how we are getting on with our Preparation for Adulthood action plan

- We will put someone in charge of each area
They will make sure all actions are completed on time

- The Preparation for Adulthood Operational Working Group are in charge of making the plan happen - they will write short reports to let people know how we are doing
