Subject: WG AAP consultation

Dear Sir/Madam

I have looked at the Council's AAP for Wood Green and am very concerned about the impact of increased traffic on Wightman Road and the Harringay Ladder area. Our residential streets are already over burdened with through traffic and as you will know currently subject to a traffic consultation which the Wood Green Plan blatantly ignores.

While I agree the shopping area needs new life, I do have to question the wisdom of making it so much bigger at a time when the trend is falling away from footfall in buildings towards online shopping. If it must be done it behoves the council to do everything in its power to enable/encourage/require customers to use public rather than private transport.

To reiterate, I object most strongly to the concept and implications of the North-south Primary Route.

Regards,

Heather Tarrant
