Subject: Feedback on Wood Green Action Plan

Hello

I have read your plans for the regeneration of Wood Green and I would like to say that I am in favour of all your suggestions.

The current Mall is in desperate need of updating and I really like your ideas around making the high street more pedestrian friendly and visually appealing. The area in general is run down and could do a lot more to entice shoppers and restaurant goers and to cater for the changing demographic on our Eastern side of Haringey. I am a resident of Haringay and I mainly shop in Muswell Hill or Crouch End or in central London. I very rarely visit Wood Green despite it being on my doorstep and an simple (but very congested) bus journey.

I particularly like the new primary routes depicted in figure 7.6. The traffic on the high street and continuing down into Green Lanes and the Grand Parade is congested and polluting so making use of alternative roads is a great idea. Re-routing traffic away from Hornsey Park Road and around the industrial area is also a great idea. Also having an alternative E-W route to Turnpike Lane is essential, this road is as congested and polluted at Green Lanes. It's also clear that a fully open and fully accessible main B road Wightman Road is essential to traffic flow.

I very much hope your plans are successful, it looks like an exciting regeneration.

Many thanks, Julie Bartley
