Subject: Comments on Wood Green action plan

Dear sirs,

I have seen the action plan for Wood Green dated February 2017 and I wish to object in the strongest terms to the assumption that large volumes of traffic will continue to be routed to Wightman road.

Wightman road is a residential road and completely unsuited to the volumes of traffic that it caters for now, let alone the increased numbers. The significant air pollution on the road and the rubbish and congestion are all issues that I wish to be considered for improvement rather than introducing measures that will make this worse.

Kind regards,

Mel Perkins
