Subject: Don't build on Met Open Land - keep it OPEN, and for wildlife!

Dear Sir/Madam

I'd like to register my objection to the proposal to build on designated 'Metropolitan Open Land' - the open reservoirs and area of hard standing that was formerly filter beds. Building on this area, proposed as part of the Wood Green area action plan, is contrary to green belt policy and will definitely have an impact on 'openness', and is therefore unacceptable. It's open land, and should remain as open land.

I believe that any development that does go ahead should be compensated for by high quality habitat creation within the site,

Yours sincerely
Nick Rau
