Dear Mr Ball,

Re: Wood Green Area Action Plan Consultation (February 2017)

Thank you for the opportunity to respond to the above consultation document. North Middlesex University Hospital welcomes the re-generation plans in outline and acknowledges that the infrastructure improvements to support the proposed increased number of homes include a new primary care health centre to accommodate 8 additional GPs.

The Trust is concerned, however, that there appears to have been no consideration of the potential impact on local Secondary Health Care and Mental Health Care provision from the anticipated increase in population. We believe therefore that, while consideration and approval are given for this regeneration scheme, further detailed work is carried out to scope the increased demand that will be placed on local Secondary Health Care and Mental Health Care services in order to ensure that provision is increased in a timely and appropriate way to ensure the health and well-being of the current and future population.

Yours sincerely,

Elizabeth McManus
Chief Executive
