Whom It may concern.

Its good to hear (TeamNoelPark woodgreen news letter\_issue #5) about what has been planned for the Woodgreen area and the opportunity this will bring, both for area and residents being apart of a cosmopolitan environment. I am also sure that all the necessary positives has been addressed and praised.. As a resident i do have some concerns and wonder how these will be address. But they may have already been addressed!.

Nonetheless they are:

What measures will be in place to combat the possible 'noise pollution' resulting from the increase socializing that will come from more restaurants in the area?

What measures will be in place to eradicate the increase probability that restaurants is a pull for rats ? To add, as this will add to home owners paying or calling out pest control?

New Infrastructure will result in a ripple effect to residents parking facility. How will the increase footprint/parking not affect the current resident parking policy?

I do expect a honest response as Homes for Haringey is known (my experiences) as an organisation that lacks clarify. Therefore a honest response is all asked.

Thank You

Sandra FELIX
