AltsMod19	Alt71 – Policy SP8	<p><i>Amend the beginning of Policy SP8 to read:</i></p> <p>The Council will secure a strong economy in Haringey and protect the Borough’s hierarchy of employment land, Strategic Industrial Locations, Locally Significant Industrial Sites, and Local Employment Areas <u>and other non-designated employment sites.</u></p> <p><u>The forecast demand is for an additional 23,800 m2 of B Class floorspace up to 2026.</u></p> <p><u>This forecast demand is to be meet through:</u></p> <ul style="list-style-type: none"> • <u>The reconfiguration and re-use of surplus employment designated land in B2 and B8 Use Classes;</u> • <u>The intensification of the use of existing employment sites (where possible);</u> • <u>The provision of B1a/b floorspace as part of mixed-use development on suitable sites, including town centre sites; and</u> • <u>The protection of existing viable B Class Uses on designated and non-designated sites.</u> <p>The <u>In addition the</u> Council will <u>also:</u></p> <ul style="list-style-type: none"> • Protect B uses (under the Use Classes Order) including light industry, logistics, warehousing and storage facilities to meet the forecast demand for an additional of 137,000m2 32,000 m2 of employment floorspace up to 	<p>Clarification of the policy position in respect of the need for additional B Class floorspace and how the Plan seeks to deliver this.</p> <p>Made in response to Planning Inspector’s comments.</p>

AltsMod22	Paragraph 5.1.21	<p><i>Amend the paragraph to read as follows:</i></p> <p>Manufacturing employment in Haringey continues to decline. Indeed, this decline is more pronounced in Haringey than in London or Great Britain. Haringey's Employment Land Study 2009 2014 reflects this change in employment base by predicting a need for a total floorspace requirement of approximately 137,000 <u>23,800</u>m² for the period 2006 – 2026. This includes a net reduction in demand for industrial <u>and warehouse</u> floorspace as well as a modest net increase in logistics, warehousing and storage facilities. The majority of demand is predicted to be for B1 floorspace including light industrial. Much of this <u>demand is to be met through the reconfiguration of redundant existing industrial and warehouse floorspace and through mixed-use development within LEA – Regeneration Areas and town centre sites, particularly could be provided</u> in Wood Green Metropolitan Town Centre and the District Town Centres. <u>The trajectory identifying the locations and phasing to deliver the additional employment floorspace needed is set out at Appendix 2b, and will assist in monitoring delivery over the plan period. Given the uncertainty around the long-term demand for employment floorspace, the Council undertakes to update the Employment Land Review every five years or within a shorter period should monitoring indicate a review is necessary. This is supported in a working paper (39) produced by the GLA, which states that employment in all sectors is</u></p>	Clarification of the policy position in respect of the need for additional B Class floorspace and how the Plan seeks to deliver this. ¹ Small site development can take place anywhere within the borough and comprises developments including changes of use and conversions (i.e. development below 0.25ha in site area) in accordance with the Pan- London SHLAA, as well as prior approvals and certificates of lawful use. Over the first 5 years of the plan, small site completions have averaged 240 net units per annum across the borough (1,203 units total).

Insert the following in Appendix 2:

In accordance with Policy SP8, a net increase of 23,800m² of B Class employment floorspace is required up to 2026. In addition to supporting proposals that intensify the use of existing employment sites, the Local Plan identifies a number of locations where employment-led, mixed use redevelopment is promoted to secure the renewal or reconfiguration of existing floorspace to provide higher quality modern employment floorspace better tailored to meeting local needs. These sites are set out in the Table below. An indicative employment floorspace capacity for each site is also shown; however it is recognised that these figures are indicative and are gross floorspace. The actual amount of floorspace (gross and net) will depend on the floorspace to be retained and reconfigured, the achievement of the maximum employment floorspace on existing employment sites having regard to the proposed overall mix, site layout and constraints, and viability.

Policy SP10 establishes a requirement for an increase in retail provision of 23,995m² floorspace (13,800m² comparison goods and 10,195m² convenience) up to 2026. As set out in Table 3.3, the Site Allocations DPD includes scope for the delivery of 25,495m² of new town centre uses floorspace. Additionally, the Tottenham AAP identifies a potential 85,570m². The vast majority of this town centre floorspace is anticipated to be within the retail Use Classes. This includes the establishing of a District Centre at Tottenham Hale, the expansion of a leisure-oriented local centre in North Tottenham, and further expansion of the retail offer in Wood Green Metropolitan Centre. It is important to note that these are gross figures, with, in some cases (notably Tottenham Retail Park, and Arena Retail Park), new town centre uses representing a more fine-grained, mixed use, walk-to retail typology, rather than the existing car-based retail parks. While representing a substantial change to the site, and the local area, this may not result in a significant change in on-site retail floorspace.
