**Subject:** Regeneration of Wood Green

You have been very specific about the number of additional dwellings and jobs. Please advise:

1. How are the additional 4,000 jobs to be created
2. Give specific details on the number of additional healthcare clinics, schools, outdoor spaces, parking, leisure facilities - all of which will be needed for such high density accommodation
3. Please confirm that if you are building literally hundreds of additional homes from the Civic centre to the tube you will widen the pavement to ease congestion
4. What provision you will make for an ageing population
4. That you will expand and improve Turnpike Lane and Wood Green tube stations with additional entrances on each side of the road as these were built in the 1930's and already struggling to cope with the present volume of passengers
5. I object to high rise buildings which will spoil the character and identity of the area and are unhealthy to live in and were knocked down in the 1970's
6. I consider that the Civic Centre should be used as Council offices and would be a perfect location for an art centre and theatre which should be provided for residents
