Subject: Wood Green Area Action Plan

The PDF is far too long to be practical as a consultation document. The online commenting facility refers to relevant pages of the PDF but does not link directly to the relevant page. I had to search for any explanation about how the proposals are going to be funded only to find very near the end of the document a reference to the Council going into partnership with private companies. There is no method of commenting on this proposal online. If people are told "we will build more housing" of course they will agree with it. If they are told, "we are going to demolish existing housing in partnership with a private company and build luxury flats" the response is likely to be different.
